

Architecture Overview

System Diagram

Add a high-level diagram of your system architecture here.

Technology Stack

Layer	Technology
Frontend	React, TypeScript
Backend	Node.js, Backstage
Database	PostgreSQL
CI/CD	<i>TBD</i>
Infrastructure	<i>TBD</i>

Design Principles

1. **Documentation as code** — all docs live alongside source code and are reviewed via pull requests.
2. **Service ownership** — every service has a defined owner visible in the Backstage catalog.
3. **Automate everything** — manual processes should be captured as runbooks and eventually automated.

Decisions

Document significant technical decisions here using a lightweight ADR (Architecture Decision Record) format.
