

Getting Started

Prerequisites

- Git
- Node.js 22+ (via nvm recommended)
- Yarn 4.x
- Docker
- PostgreSQL 16+

Clone the Repositories

```
1 git clone git@github.com:liafocus/<project>.git
2 cd <project>
3 yarn install
```

Environment Variables

Create a `.env` file or export the following variables:

```
1 export POSTGRES_HOST=127.0.0.1
2 export POSTGRES_PORT=5432
3 export POSTGRES_USER=postgres
4 export POSTGRES_PASSWORD=<your-password>
```

Running Locally

```
1 yarn dev
```

The application will be available at `http://localhost:3000`.
